

Secure your data. Get AI-ready. Governance made easy.

Master workspace lifecycle management, control oversharing, and secure data consistently, from start to finish. Be Copilot-ready with ShareGate's governance tool.

Proactively protect your environment

Keep out unwelcome guests and remove file links that are no longer meant to be shared.

Accelerate productivity

Give your users tailored workspaces with full-circle provisioning automation, and archive obsolete teams and groups.

Future-proof your governance

Build a scalable solution with actionable recommendations that set you up for AI success.

ShareGate Protect

Empower your organization to thrive in the AI world with a governance solution that optimizes workspace lifecycle management and keeps oversharing in check without breaking a sweat.

Core features include:

- ✓ Access management
- ✓ Lifecycle management
- ✓ Workspace provisioning (SharePoint and Teams)
- ✓ Centralized and actionable reporting

ShareGate is intuitive and easy to use. I use it almost on a daily basis to govern our different SharePoint and Teams environments.

— Linda G.N.
Solution Architect, KMD A/S

ShareGate Protect features

Tenant activation	A ShareGate Protect license can only be used on one tenant. The number of admins depends on the plan you purchase. With Protect only, one admin has access. With Pro and Enterprise, you have 5 or 25 admins, respectively.
External sharing review	Avoid oversharing by deleting links to files that no longer need to be shared externally.
SharePoint and Teams provisioning	Set customizable rules for templates to guide everyone in creating the workspaces the right way, from the start.
Inactivity detection policy	Easily detect and clean up inactive teams and groups.
Archive inactive teams and groups	Use your own custom Azure storage or ShareGate's default one.
ShareGate's end-user app	Users can create and manage their own workspaces from start to finish without leaving Teams.
